

# Wind Turbine Electrical Technician

Join us as part of our growing team of Wind Turbine Technician's and help us in maintaining the UK's network of onshore microgeneration wind turbines. Together with your fellow technicians you'll be responsible for performing proactive and reactive maintenance on low voltage wind turbine electrical systems as well as upgrading and installing new systems.

## Roles and Responsibilities:

- Fault finding, troubleshooting and repair of electrical installations.
- Report all work conducted accurately and in suitable time: observations, timesheets, repair & service sheets.
- Perform all work with a high level of quality, attention to detail and a focus on HSE.
- Stock take, be responsible for materials on site and keeping vehicle stocked and well equipped.
- Good time keeping, customer communication and on-site housekeeping.
- Assessing sites for electrical installations and providing feedback to office to supply quotations and carrying out installations.
- Methodical problem solving.
- Ability to work on your own or as a team, including providing remote support for fault diagnosis.
- Periodic cover for Mechanical team members.

## Why work for us:

- 30 days annual leave with increase every year employed.
- Annual performance bonus.
- Full training provided.
- Company van and fuel card.
- Salary according to experience with progression available.
- Pension scheme.

## Job Requirements:

- Full UK driving license.
- Fully qualified electrician to SVQ3/NVQ3 or equivalent.
- At least 1 years' experience post apprenticeship.
- Computer skills – competence using Office products.
- Experience low voltage systems and fundamentals of AC&DC of benefit.
- Familiarity with control systems including applicable software desirable.
- Willing to travel and spend time away from home as and when required.
- Predominantly hydraulically lowered turbines but some climbing may be required – training will be provided.

## Schedule/Location:

- Based out of our Aberdeenshire depot; with accommodation available, covering maintenance and installations across the UK.
- Normal working hours are Monday to Friday 8.00am – 5.30pm.
- Overtime and weekend work available.
